**Subject:** Ash Placement in Pond D

Jeff,

You asked if it is still necessary to keep the ash that is being placed in Pond D separate from the pond water. At one time we were pursuing a Notice of Planned Change that would have allowed us to decant Pond D under the existing permit. To improve our chances of obtaining DEQ concurrence with that approach we decided that it would be best to minimize contact of the ash and water in order to maintain a relatively consistent water chemistry. We are no longer pursuing decanting of Pond D under the existing permit so the reason for maintaining the separation of ash and water no longer exists and it is no longer necessary to do so.

Ken
